

8 November 1955

MEMORANDUM FOR MR. DULLES:

[] advises me that they had met with no success in compiling a list of Americans who attended Cambridge University at the same time as did Burgess and Maclean. STAT

[] had a fairly extensive research done at the Library of Congress in Cambridge Year Books but unfortunately no nationalities of students are indicated. They have also checked Harvard and Yale records without success. Consequently, without going to the [] for this information, [] does not know where else to try. He thinks it possible that a list of such students may exist somewhere in the State Dept. or Health, Education and Welfare, but he believes that if such a list exists it would be more readily available to the FBI than to us, as well as more properly their province to obtain it. STAT 25X1

[] does not believe that we should go to the [] and ask for this information at the present time as the matter is too sensitive. However, if you feel that it is appropriate to request this information of the [] now, they will be glad to arrange to do so. STAT 25X1
